

How to use: Free Etsy Profit Calculator

Stop guessing whether a sale actually makes money. Enter what an item costs you and what you sell it for, and this free calculator instantly subtracts every marketplace and payment fee to show your real net profit and margin. Works for Etsy, Shopify, Amazon Handmade, eBay, and your own site.

Quick start

- 1 Open the Calculator tab and pick your platform from the dropdown.
- 2 Type your item cost, sale price, shipping charged, your shipping cost, and any other per-item cost into the gold cells.
- 3 Read your net profit, margin, and break-even price. The Health Check box tells you if the price is healthy, thin, or a loss.
- 4 If a platform changes its fees, update them once in the Fee Settings tab — every calculation updates automatically.

What's inside

- **Calculator** — single-item profit, fee breakdown, margin, break-even, and a plain-English health check.
- **Fee Settings** — editable fee rates for Etsy, Shopify, Amazon Handmade, eBay, and your own website.

Tips

- › Only type in the gold cells. Everything else calculates for you.
- › Aim for a 35%+ margin on handmade goods so returns, promos, and ads don't erase your profit.
- › Etsy and eBay charge fees on the shipping you collect too — this calculator already accounts for that.
- › This free version prices one item at a time. The full Profit & Fee Calculator (\$12) adds a 20-product Bulk Calculator; the Complete Toolkit (\$39) bundles every tool. Full lineup at LedgerLane.
